

ViewSonic® ViewBook 108

Model No. VNB108

10.1" LED-backlit netbook

More Mobility and Freedom, for Less

Intel® Atom™ N450 processor

Blazing-fast at 1.66GHz, the brand-new Intel® Atom™ N450 processor is the latest advancement great for netbooks requiring ultimate mobility and decent performance.

It sports a power-saving 45nm architecture supporting 64-bit computing and 667MHz front side bus, and it's 20% smaller than its predecessors. Backed by the Intel® Atom™ N450 processor, the VNB108 works perfectly with Windows® 7 operating system for your mobile enjoyment and guarantees your investments today and in the years to come.

802.11b/g/n wireless network

The VNB108 features the latest and fastest 802.11n protocol to keep you in the loop wherever WiFi networks are available, and it's also backward compatible with the older 802.11b/g standards. With the built-in 802.11b/g/n wireless network functions, the VNB108 is capable of accessing the Internet at over 300Mbps in schools, offices, cafés or airports.

Advanced Anti-glare LED Screen

As a world recognized leader in LCD monitors, ViewSonic brings its expertise to the VNB108 netbook, providing the user with vivid colours, razor-sharp images and the latest technology. The LED backlight built into the display of the VNB108 offers, lower power for longer battery life, evenly distributed illumination of the screen, and no hazardous chemicals so it's better for the environment. The anti-glare design reduces the amount of background light reflected off the screen, making the screen easier to read wherever you may be.

Windows® 7, Optimised

The VNB108 is the best match to the brand-new Microsoft Windows® 7 operating system. Specifically designed and tuned for Windows® 7, the VNB108 employs the latest technology and advanced features to support the new Intel® Atom™ processor. You'll enjoy a fulfilling experience completely different from what you'd have on older computers with Windows® 7, which not only brings you the indulging user interface and media entertainment, but also decent performance and services that boost your mobility and productivity.
